

Java Code

```
1 Question 1
2
3 Answer: 3) A do while loop runs your code at least one time
4
5 Reason: do-while runs the code before checking the condition; while checks the
  condition first.
6
7 Question 2
8
9 First blank: &&
10
11 Second blank: 72
12
13 int a = 144;
14 int b = 33;
15 if (a > 15 && b <= 72) {
16     System.out.println("You rock!");
17 }
```
